Software Engineer | Backend & Data-Driven Systems | Python | SQL | Azure & AWS

SUMMARY

Software Engineer with 3+ years building scalable backend systems, RESTful APIs/microservices, and data-driven applications in healthcare. Strong **Python** and **SQL** (PostgreSQL) background, with hands-on experience optimizing data processing workflows, multi-tenant architecture, and RBAC-secured systems for data integrity and consistency. Proficient in cloud infrastructure (**Azure**, **AWS**), Docker/Kubernetes, and CI/CD, with experience triaging production issues and performing root-cause analysis to maintain service reliability and minimize customer disruption.

TECH STACK

- **Programming Languages:** Python | Java | JavaScript | TypeScript
- **Backend Technologies:** REST APIs | Microservices | Node.js | FastAPI
- **Databases & SQL:** PostgreSQL | SQL | MongoDB | Redis | PGVector
- **Cloud & DevOps:** Microsoft Azure | AWS | Docker | Kubernetes (AKS, EKS) | CI/CD | GitHub Actions
- **Frontend Technologies:** Angular | Chrome Extensions (MV3) | HTML5 | CSS3
- **Tools:** Postman | Jira | Azure DevOps | GitHub Copilot
- **Concepts:** System Design | Data Structures & Algorithms | Data Processing & Performance Optimization | Multi-tenant Architecture | RBAC | Root Cause Analysis & Live-Site Reliability | Agile | SDLC

EXPERIENCE

Software Engineer

Medha AI

May 2025 – Present

Bangalore, Karnataka

Associate Software Engineer

Medha AI

Jul 2023 – May 2025

Bangalore, Karnataka

Key Projects:

YASA – Scalable Spreadsheet-Based Web Application

Angular, Node.js, Python, MongoDB, PostgreSQL

- Built scalable **backend microservices** using Node.js and Python for efficient API integration and **large-scale data processing**.
- Optimized data processing workflows, improving throughput by **35%** for large datasets.
- Implemented RESTful APIs and **RBAC** to securely manage data access across multiple user roles.

AiroStrip – AI-Powered Browser Productivity Platform

Python, FastAPI, PostgreSQL, PGVector, Angular

- Developed backend **APIs** for dashboard access, AI chat, and chat history, backed by **PostgreSQL** with **RBAC** and a **multi-tenant permission system** with real-time cache invalidation for data consistency across tenants.
- Implemented a retrieval pipeline using **PostgreSQL PGVector** with hybrid semantic + keyword (BM25) search for efficient querying over large datasets.

Azure Deployment & Infrastructure Setup

Azure, Docker, Kubernetes, CI/CD, GitHub Actions

- Deployed and orchestrated containerized workloads (**Docker**, **Kubernetes** – Azure AKS & AWS EKS) with automated scaling and rollback strategies.
- Configured **CI/CD pipelines** for automated deployments, reducing deployment time by **73%** (45 to 12 minutes).
- Triage production issues and performed **root-cause analysis** across deployed services, restoring service with minimal customer disruption.

Appointment Mitra – WhatsApp Appointment Assistant

Python, WhatsApp Business API, FastAPI, PostgreSQL

- Built a **WhatsApp Business API** chatbot with a **multi-turn dialogue state machine** and **geolocation-based matching**, connected to backend services with secure data handling.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering – Computer Science
Government College of Engineering, Erode (formerly IRTT)

2019 – 2023
CGPA: 8.18 / 10

Certifications: [Software Engineer \(Problem Solving, SQL & REST API\)](#) – HackerRank | [System Design: Low-Level to High-Level Solutions](#) – GeeksforGeeks | **Generative AI Applications Using Amazon Bedrock** – AWS
