Software Engineer | Generative AI & LLM Systems | Conversational AI | Backend | Kubernetes | AWS & Azure

SUMMARY

Software Engineer with 3 years of experience developing production-grade Generative AI, Large Language Model (LLM), and backend systems in the healthcare domain. Built RAG pipelines, NLP-to-SQL platforms, and real-time conversational AI applications. Proficient in Python, FastAPI, LangChain, Kubernetes, and cloud-native microservices on AWS and Azure. Experienced in full-stack AI development, CI/CD automation, and Agile delivery.

SKILLS

Languages:	Python, JavaScript, TypeScript, SQL, Java
AI/ML:	Generative AI, Large Language Models (LLMs), LangChain, LangGraph, OpenAI API, RAG, NLP, Machine Learning, Vector Search, Prompt Engineering
Backend:	FastAPI, Flask, Spring Boot, REST APIs, WebSocket, Microservices, API Development
Cloud & DevOps:	AWS (EKS, S3, Lambda), Azure (AKS, ADLS, Cognitive Services), Kubernetes, Docker, GitHub Actions, CI/CD Pipelines
Databases:	PostgreSQL, MongoDB, Elasticsearch, Redis, Vector Databases
Frontend:	React, Angular, Electron
Tools:	Git, GitHub, Linux, Agile, Jira

EXPERIENCE

Software Engineer Narayana Health – Medha Analytics	May 2025 – Present <i>Bangalore, Karnataka</i>
Associate Software Engineer Narayana Health – Medha Analytics	Jul 2023 – May 2025 <i>Bangalore, Karnataka</i>

Key Works:

Call Center AI Copilot	Python, Node.js, LangChain, React, WebSocket
- Built a production-grade Generative AI copilot for customer care agents achieving sub-500ms response latency. - Designed RAG-based conversational AI pipeline using LangChain with contextual retrieval for real-time agent assistance. - Developed audio processing pipeline with voice activity detection (VAD) and multi-channel separation for dual-stream transcription.	
DataChat AI – Healthcare Analytics Platform	Python, LangChain, FastAPI, PostgreSQL
- Built an NLP-to-SQL system using Large Language Models to convert natural language queries into optimized SQL statements. - Implemented structured output validation, query safety checks, and caching layer supporting 500+ daily analytical queries.	
Appointment Mitra – WhatsApp AI Assistant	Python, WhatsApp Business API, LangChain
- Developed a conversational AI assistant on WhatsApp for automated hospital appointment booking. - Designed state-machine driven multi-turn dialogue workflows with geolocation-based hospital matching and payment gateway integration.	

Kube Board – Multi-Cloud Kubernetes Management Platform

Python, Flask, Kubernetes, AWS, Azure

- Built a full-stack SaaS application for centralized Kubernetes cluster management across AWS EKS and Azure AKS.
- Implemented OAuth2 authentication, role-based access control (RBAC), and real-time log streaming via Elasticsearch.
- Designed automated resource optimization reducing idle infrastructure cost.

CI/CD & Infrastructure Automation

GitHub Actions, AWS EKS, Docker, Kubernetes

- Designed automated CI/CD pipelines using GitHub Actions and Docker, reducing deployment time by 73% (45 to 12 minutes).
- Implemented blue-green deployment strategy on AWS EKS with automated health checks and rollback mechanisms.
- Integrated unit, integration, and security scan test gates into the pipeline, improving production release stability.

PROJECTS

Food Demand Forecasting System

Python, Flask, XGBoost, LSTM, Machine Learning

- Built machine learning models (Random Forest, XGBoost, LSTM) for meal demand forecasting; exposed predictions via REST API with a real-time dashboard.

EDUCATION

Bachelor of Engineering – Computer Science

Government College of Engineering, Erode

2019 – 2023

CGPA: 8.18 / 10

CERTIFICATIONS

- Generative AI Applications Using Amazon Bedrock – AWS
- System Design: Low-Level to High-Level Solutions – GeeksforGeeks
- Python for Data Science – NPTEL (IIT)
