Software Engineer | Full Stack Developer | System Design | Azure & AWS

SUMMARY

Software Engineer with 3+ years of experience building scalable full-stack web applications, cloud infrastructure, and productivity tools in the healthcare domain. Proficient in Angular, React, Node.js, Python, and FastAPI, with hands-on expertise in Microsoft Azure and AWS deployment, Docker containerization, CI/CD automation, and system design. Experienced in Agile delivery, RBAC architecture, and AI-assisted development workflows.

TECH STACK

- **Programming Languages:** Python | JavaScript | TypeScript | Java
- **Frontend Technologies:** Angular | React.js | Chrome Extensions (MV3) | HTML5 | CSS3
- **Backend Technologies:** Node.js | FastAPI | Django | REST APIs | Microservices
- **Databases:** PostgreSQL | MongoDB | Redis | PGVector
- **Cloud & DevOps:** Microsoft Azure | AWS | Docker | Kubernetes (AKS, EKS) | CI/CD | GitHub Actions | Git
- **Tools:** Postman | Jira | Azure Devops | GitHub Copilot
- **Concepts:** System Design | Multi-tenant Architecture | RBAC | Agile | SDLC | Performance Optimization

EXPERIENCE

Software Engineer

Narayana Health · Medha Analytics

May 2025 – Present
Bangalore, Karnataka

Associate Software Engineer

Narayana Health · Medha Analytics

Jul 2023 – May 2025
Bangalore, Karnataka

Key Projects:

AiroStrip – AI-Powered Browser Productivity Platform Angular, Chrome Extension, FastAPI, Azure OpenAI, PostgreSQL

- Built a full-stack **Chrome Extension (Manifest V3)** with an embedded **Angular side panel**, authentication, tab management, and cross-origin messaging.
- Developed backend APIs for dashboard access, AI chat, and chat history with **role-based access control (RBAC)**.
- Implemented a RAG pipeline using **Azure OpenAI** and **PostgreSQL PGVector** with hybrid semantic + BM25 retrieval for context-aware enterprise search.
- Designed a **multi-tenant permission system** with real-time cache invalidation for ACL updates.

Appointment Mitra – WhatsApp Appointment Assistant

PostgreSQL

Python, WhatsApp Business API, FastAPI,

- Built a conversational chatbot on **WhatsApp Business API** for automated hospital appointment booking.
- Implemented **multi-turn dialogue state machine** with **geolocation-based hospital matching** and payment gateway integration.
- Connected chatbot with backend services and databases with secure data handling throughout the booking process.

YASA – Scalable Spreadsheet-Based Web Application

Angular, Node.js, Python, MongoDB, PostgreSQL

- Designed and developed the frontend using **Angular** to deliver a dynamic and responsive user interface.
- Built scalable **backend microservices** using Node.js and Python for efficient API integration and data processing.
- Implemented RESTful APIs and **RBAC** to securely manage view/edit permissions.
- Optimized application performance improving data processing speed by **35%** for large datasets.

Azure Deployment & Infrastructure Setup

Azure, Docker, Kubernetes, CI/CD, GitHub Actions

- Managed end-to-end deployment of applications on **Microsoft Azure** using **Docker** containerization.
- Orchestrated containerized workloads on **Kubernetes** (Azure AKS and AWS EKS) with automated scaling and rollback strategies.
- Configured **CI/CD pipelines** for automated deployments across Development and Production environments, reducing deployment time by **73%** (45 to 12 minutes).
- Configured DNS for public access and SSL certificates to enable secure HTTPS communication.

AI-Assisted Development & Productivity Optimization

GitHub Copilot, Claude AI

- Leveraged **Claude** and **GitHub Copilot** across the development lifecycle to accelerate feature delivery.
- Utilized AI-assisted debugging, refactoring, and code reviews to improve code quality and maintainability.

EDUCATION

Bachelor of Engineering – Computer Science

2019 – 2023

Government College of Engineering, Erode (formerly IRTT)

CGPA: 8.18 / 10

CERTIFICATIONS

- Generative AI Applications Using Amazon Bedrock – AWS
- System Design: Low-Level to High-Level Solutions – GeeksforGeeks
- Software Engineer (Problem Solving, SQL & REST API) – HackerRank
